Claims 1-14 (cancelled)

Claim 15 (new): The method of establishing a radio network by means of a first wireless communication device capable of generating standard wired modem commands, said method comprising:

*AJ CON*

- (a) at the first wireless communication device, before the establishment of wireless communication with a second wireless communication device, sending a wireless message utilizing a standard wired modem command but substituting for wired modem information normally associated with the command, radio network information to be utilized in the initial establishment of a radio network; and
- (b) at the second wireless communication device receiving the wireless message, and utilizing the radio network information for the initial establishment of a radio network with the first wireless communication device.
